Runestone: While loops. Homework:

Go to this link:

https://runestone.academy/runestone/books/published/apcsareview/LoopBasics/lWhile.html

Read up to Activity 1. Run Activity 1, see how it works. Edit it so that it looks for the letter a, not the number 1, and replaces each a with a dollar sign. This requires 3 edits to the code. Run it to make sure the output is "H$ve $ 1ong $nd h$ppy 1ife".

Email me the entire block of code (not the output, the code that you edited, starting with public class Test and ending with the last curly brace.) My email is whays.ahs@wscuhsd.k12.ca.us.

Stop there. This is due by midnight Monday. I say do it sooner so you don't forget.

Have a great weekend. See you on Wednesday.
