

What should I do when I'm all caught up?

First: actually make sure you are done with everything by looking at the white board then logging in to Aeries. Then:

1. Make something using tools you know how to use. Have fun with it, be creative.
2. Investigate an interest and learn how to do something you've always wanted to learn.
3. Ask for a project to help improve the lab.
4. Do homework for another class.

Unacceptable behavior includes watching videos or playing video games (on your phone or a computer), messing around, distracting classmates, hanging out, going to "the bathroom" for more than 5 minutes, and playing with tools or equipment you shouldn't be touching.
